All our previous price lists and quotations are hereby cancelled.

NOTICE

The prices in this catalogue will be adhered to as far as possible, but may vary from time to time, owing to fluctuations in market rates beyond our control.

In ordering from this catalogue please state the correct name and number of the items desired.

Parties unknown to us will please include money orders or satisfactory references with their order, unless they wish goods forwarded by express, C. O. D., in which case a cash remittance on account should be sent to cover risk of acceptance, balance, if any, to be collected on delivery. Charges for collection must be paid by purchaser.

In sending money with order, any amount remaining over will be returned or placed to the credit of party as preferred.

Shipping instructions should invariably be furnished with order, and when not stated, goods will be forwarded the cheapest way.

Goods ordered to be sent by Parcel Post, will be sent insured and cost of postage will be added to invoice. All Parcel Post shipments insured unless otherwise requested.

All goods will be packed with the greatest care and no allowance will be made for damages sustained through careless handling while in transit.

All claims must be made within five days after receipt of goods.

Brittains' Limited

Duplex and Simplex

Decalcomania Transfer Papers

Supplied in reams of 500 sheets each

DUPLEX PAPER

Brittains' Duplex Paper is prepared in two standard weights of backing. The Duplex Paper consists of two sheets, a tissue and a thicker backing, sufficiently firmly attached together to run through a lithographic machine twenty or thirty times without becoming detached, while the thin tissue sheet on which the transfer is printed can subsequently be readily stripped away from the backing, and the thinness of the tissue enables it to be applied to all kinds of surfaces.

"ECLIPSE"

Pottery Printing Machine
(Patented)

This machine is the best on the market, being fitted with bunsen burner for gas heating, thus insuring uniform heating of the roller, greater cleanliness and doing away entirely with water leakage which is inevitable with steam-heated machines. There is also a special arrangement for preventing the paper from slipping and creasing.

Price\$225.00

Complete with two Mandrils, $3\frac{1}{4}$ inches and $4\frac{1}{4}$ inches diameter
ECLIPSE RUBBER ROLLER (best quality Rubber).....\$34.00

COPPER CYLINDERS

Outside Diameters: $3\frac{5}{8}$ inches, $3\frac{7}{8}$ inches, $4\frac{3}{4}$ inches
Per pound\$1.10

(Guaranteed hardness of Rollers—95—105. Brinel Test.)

Pebble Mills for Grinding and Mixing

"BALL MILLS"

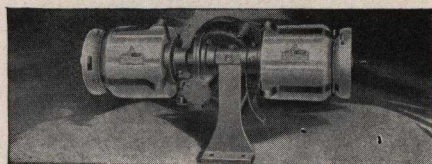

SINGLE SPECIMEN MILL, TYPE "A"

SINGLE SPECIMEN MILL, TYPE "A" with Tight Pulley.

Jar 1 qt., size 5.2 x 5.7 in. Charge of Material 1 pt. wet, up to 1½ lbs. dry. Speed 100 to 120 RPM. Complete with Pebbles as illustrated.....\$ 16.00

SINGLE SPECIMEN MILL, TYPE "B" direct connected to

1/6 H.P. Motor, including Gear Reduction Unit, Coupling, etc.\$ 70.00

DOUBLE SPECIMEN MILL, TYPE "B"

DOUBLE SPECIMEN MILL, TYPE "A" with Tight Pulley.

Jars, Speed, Etc., same as for Single Mill. Complete with Pebbles\$ 28.00

DOUBLE SPECIMEN MILL, TYPE "B" Motor Driven,

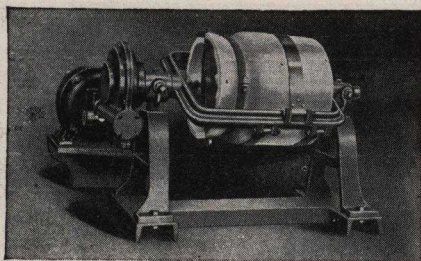

complete as illustrated.....\$ 80.00

QUINTUPLE SPECIMEN MILL, TYPE "A" with 5 Jars,

same as Single and Double Mills, with Tight and Loose Pulleys\$ 90.00

QUINTUPLE SPECIMEN MILL, TYPE "B" Motor Driven,

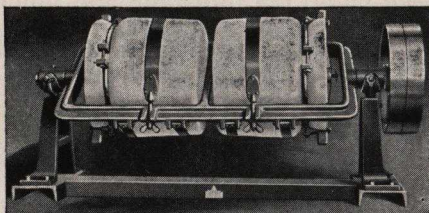

complete\$150.00

SINGLE ASSAY MILL, TYPE "F"

SINGLE ASSAY MILL, TYPE "E" with T. & L. Pulleys.
 Jar 1 gal., size 8.75 x 9.65 in. Charge of material $2\frac{1}{3}$ qt.
 wet, up to 5 lbs. dry. Speed 65 to 75 RPM. Complete
 with Pebbles\$ 37.00

SINGLE ASSAY MILL, TYPE "F" Motor Driven, as illus-
 trated\$104.00

DOUBLE ASSAY MILL, TYPE "D"

DOUBLE ASSAY MILL, TYPE "D" with T. & L. Pulleys.
 Jar, Speed, Etc., same as for Single Mill. Complete with
 Pebbles as illustrated.....\$ 61.00

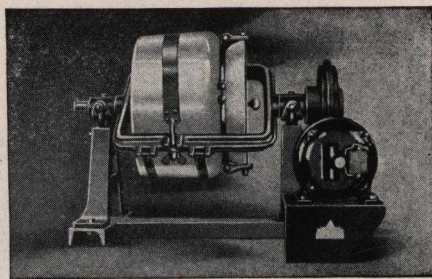

DOUBLE ASSAY MILL, TYPE "E" Motor Driven, com-
 plete as Single Mill.....\$124.00

DOUBLE ASSAY MILL, TYPE "F" with T. & L. Pulleys,
 equipped with Wall Brackets instead of baseplate and floor-
 stands\$ 70.00

QUADRUPLE ASSAY MILL, TYPE "A" with T. & L. Pul-
 leys, complete with four Jars.....\$125.00

QUADRUPLE ASSAY MILL, TYPE "E" Motor Driven,
 complete\$225.00

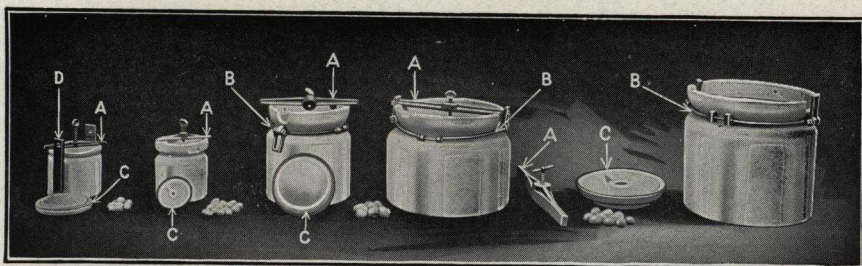

NOTE: Mills can be supplied for 6, 8, 9 and 12 assay size Jars
 both with T. & L. Pulleys and Motor Driven.

SINGLE No. 0 JAR MILL, TYPE "B"

SINGLE #0 JAR MILL, TYPE "A" with T. & L. Pulleys. Jar 2½ gal., size 12.5 x 9.6 in. Charge of material 5 qt. wet, 10 lbs. dry. Speed 50 to 60 R.P.M. Complete with Pebbles	\$ 60.00
SINGLE #0 JAR MILL, TYPE "B" Motor Driven, complete as illustrated	\$150.00
The above cut illustrates the type of motor drive, gear casing, etc., used on all the foregoing and following Mills.

FLEXIBLE RULER

Size 1. 10 in. long, $\frac{3}{8}$ in. wide, graduated to $\frac{1}{8}$ in.each, \$0.30

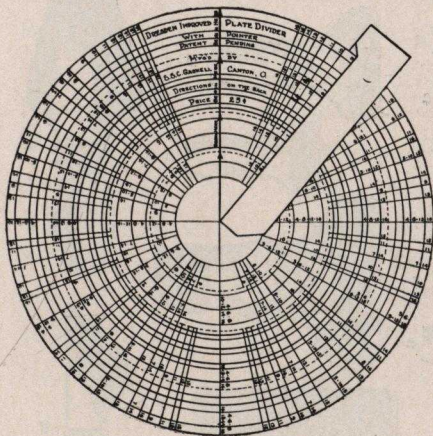

Size 2. 18 in. long, $\frac{3}{8}$ in. wide, graduated to $\frac{1}{16}$ in.each, .40

This Ruler is of flexible steel and can be used on either a straight or curved surface. The Ruler is backed by a strip of slightly narrower rubber which rests on the surface, thereby elevating the Ruler so that the edge can be followed with a pen without blurring.

RING DIVIDERS

Consisting of 3 rings, all marked in plain figures, for measuring or dividing Vases, Jugs, Bowls, Plates, Etc.each, \$0.10

THE DRESDEN IMPROVED PLATE DIVIDER

This is an accurate and serviceable apparatus for the purpose.

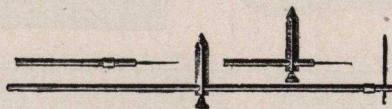

It combines all the advantages of a perfect divider, and is easily converted into a set of accurate ring dividers, if desired.

Every line is correctly spaced and numbered. Heavy circles show the sizes of plates made by the French and German potteries.

For convenience it also has both the decimal scale and the inches shown on the border.

Full directions for use with each dividereach, \$0.25

KERAMIC GAUGE

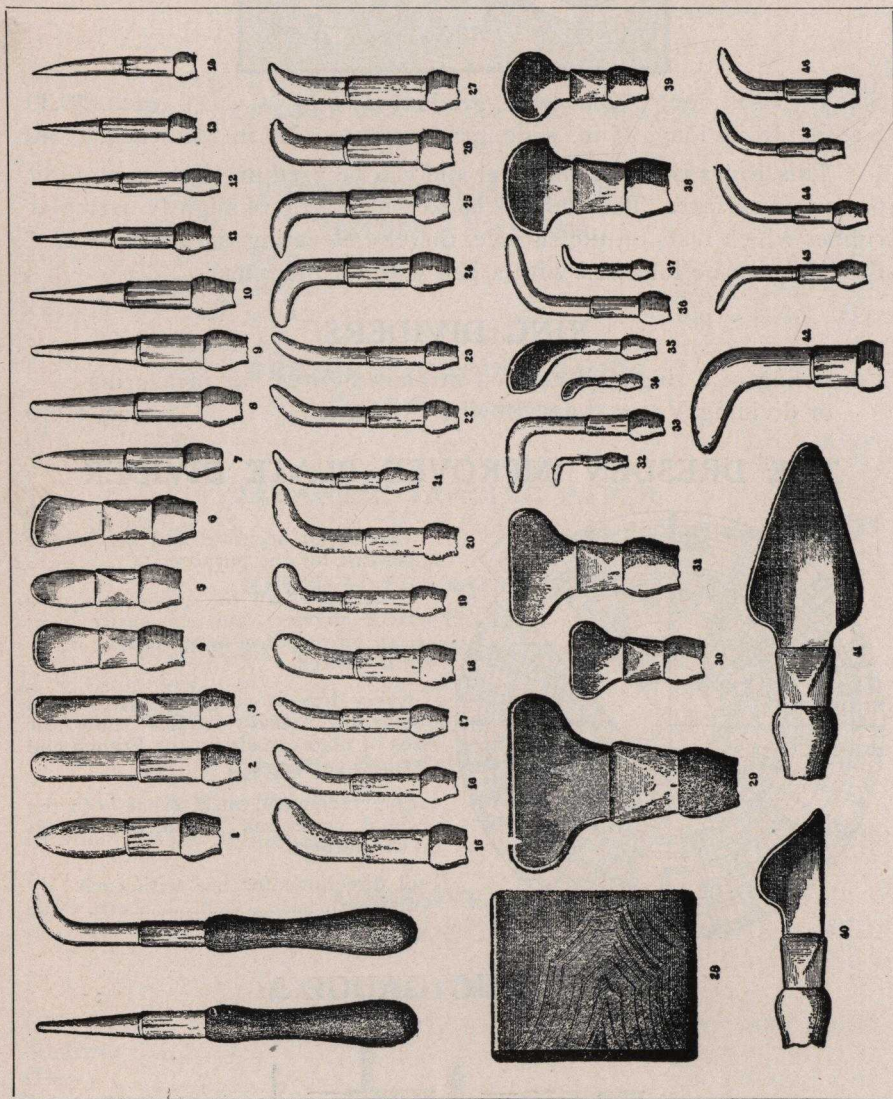

For banding and centering plates, vases, etc.each, \$1.00

Lead Points for use in Ceramic Gaugeper box, .50

**ADJUSTABLE CAST-IRON PLATE RACK**

This Plate Rack has demonstrated itself of greatest value for stacking plates from the smallest to the largest size in the Decorating Kiln. The use of stilts, spurs, etc., is entirely eliminated and a rapid and safe method of stacking with uniform distribution of heat is secured with this thoroughly practical device. The strong construction of the Plate Rack insures many years' service, and all that is required in this connection is that the Rack be given an occasional coat of whitewash.

Priceeach, \$2.50

Potters Kick Wheel

FOR THROWING ART POTTERY

Adapted for Use in Schools, Colleges, Studios and Workshops

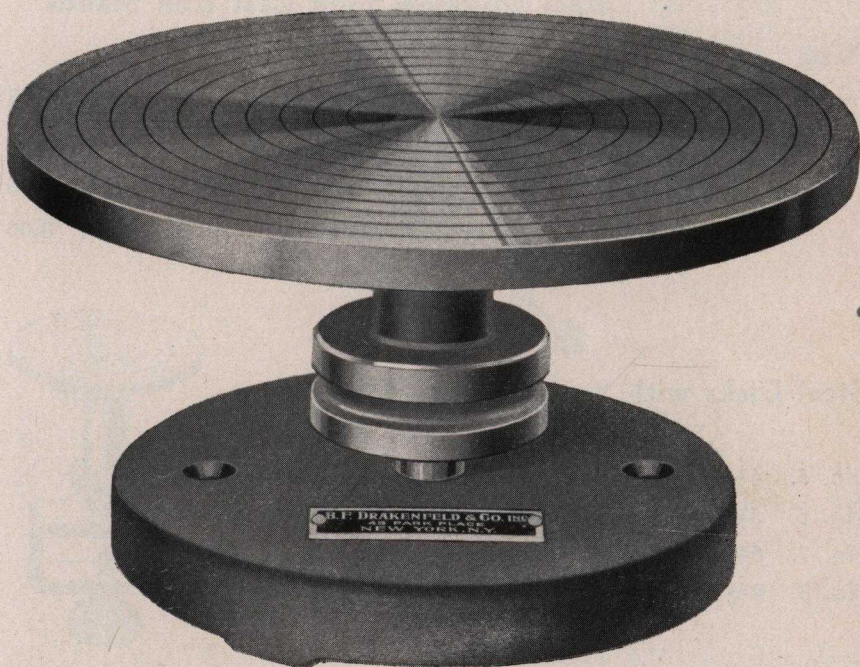

The Potters Kick Wheel is made and Machined to Precision and a vast improvement over the old fashioned Kick Wheel.

Simplicity of Operation is made possible by a Ball-bearing (Thrust) Attached to the Shaft to lessen Friction and with the correct balanced weight of the Fly (Kick) Wheel, the Operator is enabled to obtain easy momentum with the least effort.

The Wheel (as illustrated) is Furnished Complete (including directions for setting-up and making the Bench.

Price Each, \$75.00

Bench Whirlers

The larger 12 inch diameter heads and the smaller $8\frac{1}{4}$ inch diameter heads are interchangeable.

This whirler is designed with a pulley (groove) for round leather belt for foot-power treadle or small electric motor.

Spraying Equipment

For Prepared Glazes-Enamels, Etc.

COMPLETE COMMERCIAL CAPACITY DE VILBISS SPRAY-FINISHING OUTFIT—TYPE AP-626

This is a commercial capacity outfit, complete in every detail, and one with which the user can do extensive work. This outfit includes two complete Type AV-504 Spray Guns. Two suction feed cups, a pressure feed tank, an insert container and an extra insert container.

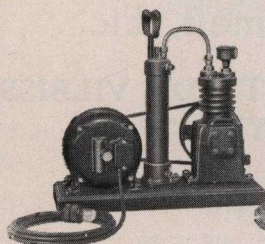

Type AP-626 Spray-finishing Outfit,
complete, Sh. Wt. 90 lbs.....\$150.60

Outfit consists of:

2-AV No. 504 Spray Guns complete with adjustable spray heads, one with No. 34 Air Cap "F" Fluid Nozzle for pressure tank, and one with No. 32 Air Cap "E" Fluid Nozzle for suction cup	\$56.00
2 KR Suction-Feed Cup Attachments, quart capacity.....	8.00
1 QM 2-gal. Pressure-Feed Tank with Insert Container.....	38.90
1 Holder Base for Tank.....	2.50
1 Extra Insert Container with Cover.....	1.75
2 25-ft. lengths 5/16-in. Air Hose with Connections.....	7.90
1 15-ft. length 3/8-in. Fluid Hose with Connections.....	3.70
1 15-ft. length 5/16-in. Air Hose with Connections (for use with QM tank)	2.85
1 H-585 Fluid Cut-Off Valve.....	1.00
1 HL Air Transformer.....	28.00

Note: Where air compressing equipment of greater capacity is required information will be furnished on request.

DE VILBISS $\frac{1}{4}$ HP PORTABLE ELECTRIC SPRAYING OUTFIT—TYPE NC-605

A compact, highly efficient outfit which weighs only 48 lbs., and operates from a light socket. Ideal for small finishing operations and all kinds of touch-up work. Invaluable for small emergency jobs. Gun is of pressure-feed type.

Outfit consists of:

1 NC $\frac{1}{4}$ -H.P. electric motor
belt-driven compressing
equipment on rubber-footed

metal base (as below)

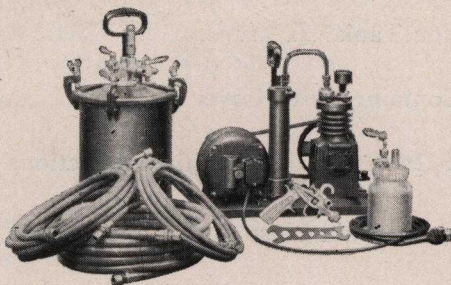

1 GP pressure-feed spray gun with 24-oz. metal cup, two air
caps (for round and flat spray), wrench and cleaning brush. \$11.25

1 15-ft. length $\frac{1}{4}$ -in. braid-covered air hose and connections..... 2.20

(Sh. Wt. 79 lbs.) (Sh. Wt. 55 lbs.)

DE VILBISS 1/5 HP PORTABLE ELECTRIC SPRAYING OUTFIT—TYPE NA-601

An efficient, light-weight exceptionally compact outfit with gun of pressure-feed type, adjustable for either round or flat spray. Ideal for use for odd spraying jobs. Motor and compressor unit weighs only 5¼ lbs. Operates from any 110-volt light socket.

Type NA-601 Spraying Outfit, complete, Sh. Wt. 10½ lbs.....\$29.95

DE VILBISS HAND-POWER SPRAY-PAINTING OUTFIT—TYPE 260

A simple bulb-operated outfit for small decorative work. Has two spray tips for handling varied solutions.

Type 260 Spray-Painting Outfit, complete, Sh. Wt. 2 lbs.....\$1.50

DE VILBISS ARTIST'S AIR-BRUSH OUTFIT

For fine art work, retouching, etc. Superior in operating efficiency because, like the large DeVilbiss Spray Guns, it embodies the exclusive ball-and-cone principle which assures positive alignment of fluid tip and air cap, and therefore a free, uniform flow of material at all times. Intended for use with Type NF or similar air compressing outfit. Gun hanger, with screws, included in outfit.

Type AB-601 Artist's Air Brush Outfit in plushlined leatherette case, complete, Sh. Wt. 2 lbs.....\$22.00

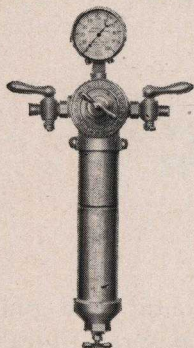

Outfit consists of:

- 1 AB Artist's Air Brush, complete with $\frac{1}{8}$ -oz. detachable metal color cup, with strainer, and extra fluid needle, in case.....\$21.00
- 1 8-ft. length braid-covered air hose and connections.....1.60
- 1 H-87 air cock for connection to air line......50

Extra Equipment:

- Extra $\frac{1}{8}$ -oz. metal cup......40
- $\frac{1}{3}$ -oz. metal cup......80
- $\frac{1}{2}$ -oz. glass container......60
- 1-oz. glass container......60

DE VILBISS OIL AND MOISTURE SEPARATOR AND AIR REGULATOR—TYPE HB

For removing moisture and oil and filtering impurities from compressed air supply, and regulating air pressure. Equipped with gauge to indicate pressure, as well as drain cock and wall mounting bracket. Brass throughout, except regulator cap of zinc.

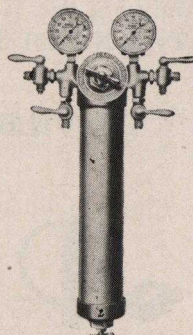

Type HB-502 Oil and Moisture Separator and Air Regulator, complete, Sh. Wt. 8 lbs.\$16.00

DE VILBISS AIR TRANSFORMER—TYPE HL

For producing high grade finishes, the DeVilbiss Air Transformer ranks second in importance only to the DeVilbiss spray gun itself.

It consists of an extra large condenser, equipped with a series of baffles, and a filter through which the air passes on its way from the compressor to the gun.

The baffles and filter collect all the moisture, oil and other foreign matter, which is drained off through a valve at the bottom. This allows only clean, dry air to reach the gun, thus protecting the finish from defects.

(Continued on next page) .

Air regulator permits pressure to be adapted to working conditions. Two gauges, one for indicating the main line pressure, and the other indicating the regulated pressure delivered to the spray gun hose are furnished. The valve can be set for any desired pressure. This insures uniform pressure of air at the nozzle, and therefore a uniformly coated surface.

Type HL-603 Air Transformer, Sh. Wt. 17 lbs..... \$28.00

DE VILBISS SPRAY GUN—TYPE AV-504

DeVilbiss Spray Gun, Type AV-504, is a production type gun widely used in decorating, or refinishing as it insures superior quality of finished work, high speed and great economy. The Type AV-504 spray gun has the self-aligning spray head which insures the proper "pattern," either elliptical or round as may be desired. The thickness of the application is kept uniform by this feature which also stops split sprays, over sprays and spattering.

This spray gun has a removable spray head which facilitates quick change from one material to another and permits easy cleaning, prolonging the life and efficiency of the spray gun. Has positive fluid control which quickly and correctly proportions the flow of the material to the flow of the air. Graduated adjustment valve permits quick change from fan to round spray, or vice versa, and positively controls the spray as to width. This is done by a simple adjustment to easily read graduations.

Removable
Spray Head

The positive fluid cut-off feature insures a tight joint when the fluid port is closed; stops dripping of material. The spray gun is easy to operate, has a comfortable firm grip, correct balance and free trigger action. All parts are interchangeable, enclosed and protected.

Type AV-504 Spray Gun can be used either with suction or pressure material feed; operates satisfactorily with a 1½ H.P. or larger air compressor, although with certain air caps and under certain conditions, it will operate with a 1 H.P. air compressor. This spray gun consumes between 4½ and 8 cubic feet of air per minute at 40 pounds pressure.

Type AV-504 Spray Gun complete with adjustable spray head and wrench, Sh. Wt. 2 lbs..... \$28.00

Extra adjustable spray head for Type AV-504 Spray Gun, Sh. Wt. 1 lb..... 9.50

DE VILBISS SPRAY GUN—Type CV 502

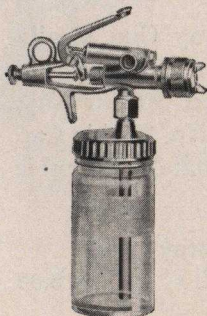

We highly recommend this gun for all purpose spraying in small decorating departments.

Type CV-tow Spray Gun..... \$18.00

Type C-428 Suction Feed Cup Attachment with screw top, glass container, 6 oz. capacity 2.00

Type C-429 Suction Feed Cup Attachment with screw top, aluminum container, 6 oz. capacity 2.25

Type C-447 Suction Feed Cup Attachment with screw top, glass container, 16 oz. capacity 2.00

DE VILBISS SPRAY GUN—TYPE AV-504 WITH TYPE KR-501 SUCTION FEED CUP

Where a variety of colors and materials, adaptable to suction feed, are used in comparatively small quantities at a time, the De Vilbiss Spray Gun, Type AV-504, with Suction Feed Cup, Type KR-501, will be found to meet this condition exactly. In two or three seconds, one feed cup can be detached from the spray gun and another feed cup put in its place. The attachment is simple and an air-tight connection is easily secured.

Extra, quickly interchangeable cups, containing colors or materials most frequently used, can be kept on hand, thus eliminating the need of cleaning the cup each time. This reduces the changing of color or material to a few seconds.

Type AV-504 Spray Gun complete with adjustable spray head
and Type KR-501—1 Suction Feed Cup Attachment (quart
capacity) Sh. Wt. 4 lbs. \$32.00
Extra Type KR-501 Cup Attachment (one quart capacity) 4.00

DE VILBISS SPRAY GUN—TYPE CH-502

For use with suction feed cups or pressure feed tanks, on medium or small sized jobs in decorating, refinishing, touch-up work, etc., light, weighing only 13 ounces; easily handled but sturdily made to withstand hard usage; properly balanced to insure long continuous operation with minimum fatigue. Has self-aligning spray head, graduated adjustment valve and positive fluid cut-off of same design as is used on the Type AV-504 spray gun. With the exception of the removable spray head, the Type CH-502 is very much the same as the Type AV-504, only it is much smaller and is designed for lighter work. Produces perfectly atomized, uniform soft spray under all conditions.

The low air consumption of the Type CH-502 Spray Gun ideally adapts it for use with compressing outfits of $\frac{1}{2}$ H.P. or larger, having pressure control. For touch-up work, order with No. 90 Air Cap, "F" Fluid Nozzle. For heavier materials order with No. 92 Air Cap "E" Fluid Nozzle. This spray gun consumes approximately $3\frac{1}{2}$ cubic feet of air per minute at 35 pounds pressure.

Type CH-502 Spray Gun complete with adjustable spray head
and wrench, Sh. Wt. $1\frac{1}{2}$ lbs. \$18.00

DE VILBISS SPRAY GUN—TYPE CH-502 WITH SUCTION FEED CUP ATTACHMENT—TYPE KS

A very efficient and highly satisfactory combination of a small spray gun and a small suction feed cup attachment results from the use of the Type CH-502 Spray Gun with Type KS Suction Feed Cup Attachment. On jobs where small quantities of materials, adaptable to suction feed, are used, where the frequent change of color is required, this combination is ideal. Any number of extra cups may be kept in readiness for instant use. When another material or color is needed, the cup containing it is merely interchanged with the one on the spray gun and the work goes on without delay.

The Type CH-502 Spray Gun is here illustrated with the Type KS 24-ounce Suction Feed Cup Attachment. This suction feed cup attachment is also obtainable in an 8-ounce size.

Type CH-502 Spray Gun complete with adjustable spray head and Type KS-503 Metal Suction Feed Cup Attachment (24-ounce capacity) Sh. Wt. 3 lbs. 2 ozs.....	\$21.75
Type CH-502 Spray Gun complete with adjustable spray head and Type KS-502 Metal Suction Feed Cup Attachment (8-ounce capacity) Sh. Wt. 2 lbs. 10 ozs.....	21.50
Type KS-503 Suction Feed Cup Attachment, (24-ounce capacity) Sh. Wt. 1 lb. 6 ozs.....	3.75
Type KS-502 Suction Feed Cup Attachment (8-ounce capacity) Sh. Wt. 12 ozs.....	3.50

DE VILBISS SPRAY GUN—TYPE CB-501

Type CB-501 Spray Gun is similar to the Type CH-502 and is intended for work of the same general character, but is designed for use with air compressing outfits of $\frac{1}{2}$ H.P. or larger having no pressure control. May be used with pressure feed only, either tank or cup. Has bleeder air valve which prevents the building up of pressure in air hose when spray gun is not being used.

Also equipped with air adjusting valve for the regulation of atomizing pressure at the nozzle. Consumes $3\frac{1}{2}$ cubic feet of air per minute at 35 pounds pressure.

Type CB-501 Pressure-Feed Spray Gun, complete with wrench, Sh. Wt. $1\frac{1}{2}$ lbs.....	\$18.00
--	---------

DE VILBISS PRESSURE-FEED CUP—TYPE KL

Designed for quick attachment to Type CH-502 or CB-501 spray gun when heavy materials are to be applied and when stippled, speckel or veiling effects are desired. Metal cup; capacity 24 ounces. Equipped with safety valve, and valve which permits tilting of gun without fluid getting into air passages of gun.

Type KL-503 Pressure-Feed Cup (24-ounce capacity)
Sh. Wt. 8 ozs. complete.....\$5.25

DE VILBISS SPRAY GUN—TYPE GP-503 & 504

This is a pressure-feed gun which operates on low air pressure and sprays both light and heavy materials with equal facility. Each gun is supplied with two air caps, one for round and one for flat spray. The GP-503 and 504 gun is intended for use with $\frac{1}{4}$ H.P. or larger air compressing outfits, and is available in two types to meet varying requirements.

Type GP-504 is equipped with a bleeder type air valve and is for use with air compressing outfits having no means of pressure regulation, such as the Types NC, NK and NH outfits. The Type GP-503 gun has non-bleeder type air valve and is for use with compressing outfits equipped with pressure regulating device, such as the Type NF outfit.

Type GP-504 Pressure-Feed Spray Gun, with bleeder valve, complete with 24-oz. metal cup, two air caps, wrench and cleaning brush, Sh. Wt. 3 lbs.....\$11.25

Type GP-503 Pressure-Feed Spray Gun, without bleeder valve, complete with 24-oz. metal cup, two air caps, wrench and cleaning brush, Sh. Wt. 3 lbs..... 11.25

DE VILBISS SPRAY GUN—TYPE GF

A low priced suction-feed gun, with bleeder valve; simple in construction and efficient in operation. Spray head adjustable for round or fan spray. Standard pint Mason fruit jars serve as extra containers.

Intended for use with Type NC or larger air compressing outfit.

Type GF-501 Suction-Feed Spray Gun, with 16-oz. glass cup, Sh. Wt. 3 lbs.....\$4.50

DE VILBISS SPRAY GUN—TYPE GS

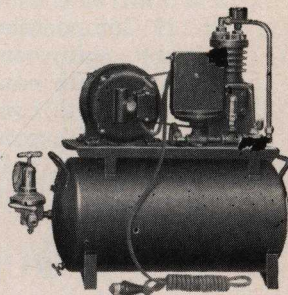

Suction-feed type, for use with hand-power outfits in spraying finishing materials and other solutions. Takes standard pint Mason jar.

Type GS-501 Suction-Feed Spray Gun, with

16-oz. glass cup, Sh. Wt. 2 lbs.....\$4.00

**DE VILBISS 1/4 HP ELECTRIC AIR COMPRESSING OUTFIT—TYPE NF**

Ideally suited to the needs of small plants, and all others having need for a small, easily portable quietly operating and trouble-free outfit of high efficiency. Will operate one De Vilbiss Artists Air Brush continuously or a Type CH or CV Gun intermittently. Equipped with automatic starting and stopping switch, pressure regulator and gauge.

Type NF 1/4-H.P. Electric Motor

Driven Air Compressing Outfit,

complete with Automatic Switch,

Pressure Regulator and Gauge, Net Wt. 68 lbs., Sh. Wt.

$\frac{5}{16}$ -in. Braid-Covered Air Hose Connections (one bent and one straight), per set	1.20
$\frac{5}{16}$ -in. Braid-Covered Air Hose Connections (one straight and one ferrule), per set	.60

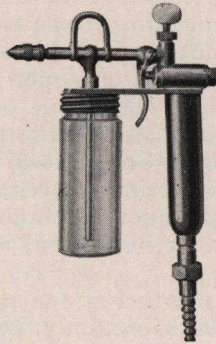

RUBBER COVERED AIR HOSE

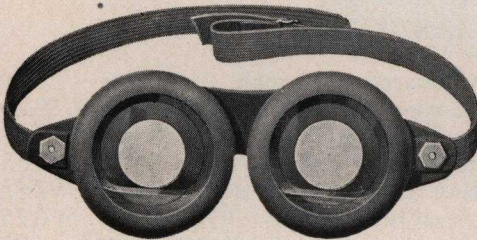

Type H-113 Air Hose—Rubber-Covered, $\frac{5}{16}$ -inch.

12-ft. length, straight connections both ends	\$2.30
12-ft. length, straight connection one end, bent at the other	2.50
15-ft. length, straight connections both ends	2.65
15-ft. length, straight connection one end, bent at the other	2.85
25-ft. length, straight connections both ends	3.75
25-ft. length, straight connection at one end, bent at the other	3.95
50-ft. length, straight connections both ends	6.50
$\frac{5}{16}$ -in. Air Hose, only, per foot	.11
$\frac{5}{16}$ -in. Air Hose, straight connections, per set	1.00
$\frac{5}{16}$ -in. Air Hose Connections (one Bent and one Straight), per set	1.20
H-431 Bent Fitting	.50
H-87 Air Cock with $\frac{1}{4}$ -in. pipe, $\frac{9}{16}$ -in. x 20 thread	.50
H-89 Coupling to connect two lengths	.30
H-262 Adapter— $\frac{1}{4}$ -in. pipe (female) to DeVilbiss Standard $\frac{9}{16}$ -in. x 20 thread (male)	.30
H-330 Adapter— $\frac{3}{8}$ -in. pipe (female) to DeVilbiss Standard $\frac{9}{16}$ -in. x 20 thread (male)	.30
H-4020 Adapter (Elbow)—DeVilbiss Standard $\frac{9}{16}$ -in. x 20 thread (female) to $\frac{1}{4}$ -in. pipe (male)	.50

"Eureka" Spraying Machine

Eureka Spraying Machine including twelve 4 ounce Screw Top Jars	complete each	\$16.00
4 ounce Screw Top Jars.....	per dozen	1.50
Needles, (Coarse, Medium, Fine and Extra Fine).....	each	.50
Nozzles	each	.50

NEW GAS TIGHT
Rubber Goggles
\$1.25 PER PAIR

AUTOMATIC RUBBER RESPIRATOR

A Thorough Safeguard Against the Inhalation of Fumes, Vapors and All Kinds of Dust.

Automatic Rubber Respirator.....each, \$1.50

Publications

Books of Instruction and Technical Publications pertaining to the Manufacture and Decoration of Pottery, Glass, Enameled Ware, etc.:

- Seger's Work.** The writing of Herman Augustus Seger.
Vol. 1 & 2. Per Set.....\$15.00
- The Potters Craft.** A Practical Guide for the Studio and Workshop. 46 ill., 26 fullpage plates 5 x 7½. 222 pp. By C. F. Binns.....per copy, 2.50
